

Champion Dust Collector

The Champion Dust Collector is designed to maintain a clean and safe dental laboratory environment by efficiently capturing fine dust particles generated during trimming, polishing, and grinding procedures. With strong suction performance and low-noise operation, it enhances operator comfort while protecting equipment and workspace hygiene.

Specification	Details
Product Type	Dental Laboratory Dust Collector
Suction Type	High-Speed Motor Suction
Power Supply	220V / 50Hz
Power Consumption	Approx. 550W
Noise Level	Low Noise Design
Filter Type	Replaceable Dust Filter
Installation	Tabletop
Application	Dental Lab Procedures
Construction	Heavy-Duty Metal Housing

Key Features

- High Suction Power – Efficient dust extraction
- Low Noise Operation – Comfortable working environment
- Compact Tabletop Design – Space-saving solution
- Replaceable Filter System – Easy maintenance
- Durable Construction – Built for continuous lab use
