

# Clinical Micro Motors

## OZ-BLACK Brushless Motor

The Saeshin OZ Black Brushless Clinical Motor is a high-performance dental micromotor engineered for precision-driven clinical and laboratory procedures. With advanced brushless technology, smooth torque delivery, and digital speed control, it ensures quiet operation, long lifespan, and consistent performance for demanding dental workflows.

Specification	Details
Motor Type	Brushless Clinical Micromotor
Maximum Speed	Up to 50,000 RPM
Speed Control	Digital Control System
Rotation	Forward / Reverse
Torque	High Torque Output
Noise Level	Low Noise Operation
Handpiece Type	Brushless Compatible Handpiece
Power Input	110V / 220V, 50/60Hz
Control Method	Touch / Digital Interface
Application	Clinical & Laboratory Use

Desktop type  
BRUSHLESS high  
performance, Strong  
torque at low speed  
Vertical/Horizontal  
placement
