

X-MILL 500 PLUS 5-AXIS

X-Mill 500 milling machine is 5 axis dental carving and milling machine, integrated design, making work regionalization simplicity

SPECIFICATIONS:

Name	Dimension	X-mill 500 plus
Net weight	Milling	(L*W*H): 630*730*700(mm)
Range		Approximately 197 kg
Max. Speed		XYZ:110/160/80mm A:±30° B:360°
Input Voltage		60,000 rpm
Axis	Quantity	Single Phase AC 220V
Milling Mode	Max	5
feeding Speed		Dry milling
Bur Changing		XYZ: 6000 mm/min
Bur capacity		Automatic
		8
Spindle Cooling		Water cooling
Materials		zirconia, wax, acril, alluminium , soft metal
Spindle Power		1.8 kw

Fitting with X-soform operation platform and supporting the use of digital denture; Horizontal structure design, the key control unit is made of high quality imported original, screw, guide rail, such as components and maintenance-free design, reducing the equipment for professional maintenance problems. High speed, high precision machining, wax takes 3-4 min/pc , zirconium takes 8-10 min /pc.
